

Paul Laskin

Cirrh9

- CIO - Chief Innovation Office
- Co-Founder

LSIT Global Institute

- Board of Directors
- Technology Advisory Board
- Founding Committee Member

Paul Laskin is co-founder and CIO at Cirrh9, a systems integrator specializing in cloud computing and opens source software solutions. He began his career in life sciences as a researcher working at several pharmaceutical companies including Allergan, McGaw Inc. and Agouron Pharmaceuticals.

At Agouron, he relinquished his lab coat and joined the IT group to manage the IT implementation of the company's ERP system. Paul held a variety of positions culminating in leading the IT group responsible for Pfizer's R&D data centers in Europe. He returned to the States as Director of IT Strategy & Portfolio in 2003 and finally left Pfizer in 2008 to co-found Cirrh9. In addition to his role with Cirrh9, Paul is a board member of LSIT, a non-profit organization dedicated to building Good Informatics Practices to help improve the quality and trust of IT within the Life Science industry.
